

## English

A journey into a land far, far away awaits us! It will take us through exciting stories and characters. We will learn to retell traditional stories, fables, narratives from other cultures and stories from a different viewpoint.

We will explore different genres to develop our writing skills. We will cover poetry, descriptions, letters and diary entries.

## Science

During the autumn term, we will be investigating ourselves, including how we have changed since being a baby, our senses and keeping healthy. We will also be investigating two of our seasons- Autumn and Winter.

### Year 1

### AUTUMN TERM

## In a land far, far away.

## Maths

We follow the updated White Rose scheme of learning, beginning with place value. We will first cover numbers to 10, then 20. Within these units we will focus on counting, representing numbers, comparing and ordering numbers.

We will also look at addition and subtraction within 10. Finally, we will cover 2D and 3D shapes by learning to recognise and sort them.

Throughout the term, there will be a focus on fluency. We aim for children to be able to recall key facts, such as number bonds to 10.

## History & Geography

We will look at maps and their features. How can we use maps in our everyday lives? We will explore how writing has changed over time with technology.

## Art & Design and Technology

During the autumn term, we will use various materials creatively, to design and create for a specific purpose.

## E4S

This term we will be focusing on new beginnings and understanding our feelings, including friendships and working with others.

## Computing

During the term, we will be using programmable robots to create algorithms. We will also be debugging them and developing our problem solving skills.

## Music

We will learn a range of new celebration songs for Harvest Festival and Christmas.

## RE

We will be learning about Christianity and Judaism this term and will compare the Church and Synagogue.

## PE

We will be building our balance and movement skills in our lessons. In games, we will be developing our hand and foot control.
